QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended November 24, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-32113

RESOURCES CONNECTION, INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

33-0832424
(I.R.S. Employer
Identification No.)

17101 Armstrong Avenue, Irvine, California 92614
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (714) 430-6400

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input checked="" type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 19, 2012, there were approximately 41,004,862 shares of the registrant's common stock, \$0.01 par value per share, outstanding.

RESOURCES CONNECTION, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Three and six months ended November 24, 2012 and November 26, 2011

1. Description of the Company and its Business

Resources Connection, Inc. (“Resources Connection”), a Delaware corporation, was incorporated on November 16, 1998. Resources Connection is a multinational professional services firm; its operating entities provide services primarily under the name Resources Global Professionals (“Resources Global” or the “Company”). The Company is organized around client service teams utilizing experienced professionals specializing in accounting, finance, risk management and internal audit, corporate advisory, strategic communications and restructuring, information management, human capital, supply chain management, healthcare solutions, actuarial, legal and regulatory services in support of client-led projects, interim needs and consulting initiatives. The Company has offices in the United States (“U.S.”), Asia, Australia, Canada, Europe and Mexico.

The Company’s fiscal year consists of 52 or 53 weeks, ending on the last Saturday in May. The second quarters of fiscal 2013 and 2012 consisted of 13 weeks each.

2. Summary of Significant Accounting Policies

Interim Financial Information

The financial information as of and for the three and six months ended November 24, 2012 and November 26, 2011 is unaudited but includes all adjustments (consisting only of normal recurring adjustments) that the Company considers necessary for a fair presentation of its financial position at such dates and the operating results and cash flows for those periods. The year-end balance sheet data was derived from audited financial statements, and certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) have been condensed or omitted pursuant to Securities and Exchange Commission (“SEC”) rules or regulations; however, the Company believes the disclosures made are adequate to make the information presented not misleading.

The results of operations for the interim periods presented are not necessarily indicative of the results of operations to be expected for the fiscal year. These condensed interim financial statements should be read in conjunction with the audited financial statements for the year ended May 26, 2012, which are included in the Company’s Annual Report on Form 10-K for the year then ended (File No. 0-321113).

Contingent Consideration

The Company estimates and records the acquisition date estimated fair value of contingent consideration as part of purchase price consideration for acquisitions occurring subsequent to May 30, 2009. Additionally, each reporting period, the Company estimates changes in the fair value of contingent consideration and any change in fair value is recognized in the Consolidated Statement of Operations. The estimate of the fair value of contingent consideration of Sitrick Brincko Group requires very subjective assumptions to be made of future operating results, discount rates and probabilities assigned to various potential operating result scenarios. Future revisions to these assumptions could materially change the estimate of the fair value of contingent consideration and related tax balances and, therefore, materially affect the Company’s future financial results and financial condition.

Under the terms of our acquisition agreements for Sitrick Brincko Group, up to 20% of the contingent consideration is payable to employees of the acquired business at the end of the measurement period to the extent certain growth targets are achieved. The Company records the estimated amount of the contractual obligation to pay the employee portion of the contingent consideration as compensation expense over the service period as it is deemed probable that the growth targets will be achieved. The estimate of the amount of the employee portion of contingent consideration requires very subjective assumptions to be made of future operating results. Future revisions to these assumptions could materially change our estimate of the amount of the employee portion of contingent consideration and, therefore, materially affect the Company’s future financial results and financial condition.

Cash, Cash Equivalents and Short-Term Investments

The Company considers cash on hand, deposits in banks, and short-term investments purchased with an original maturity date of three months or less to be cash and cash equivalents. The carrying amounts reflected in the consolidated balance sheets for cash, cash equivalents and short-term investments approximate the fair values due to the short maturities of these instruments.

Client Reimbursements of “Out-of-Pocket” Expenses

The Company recognizes all reimbursements received from clients for “out-of-pocket” expenses as revenue and all such expenses as direct cost of services. Reimbursements received from clients were \$2.8 million and \$3.3 million for the three months ended November 24, 2012 and November 26, 2011, respectively, and \$5.5 million and \$6.8 million for the six months ended November 24, 2012 and November 26, 2011, respectively.

Foreign Currency Translation

The financial statements of subsidiaries outside the U.S. are measured using the local currency as the functional currency. Assets and liabilities of these subsidiaries are translated at current exchange rates, income and expense items are translated at average exchange rates prevailing during the period and the related translation adjustments are recorded as a component of comprehensive income or loss. Gains and losses from foreign currency transactions are included in the Consolidated Statements of Operations.

Net Income Per Share Information

The Company presents both basic and diluted earnings per share (“EPS”). Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted EPS is based upon the weighted average number of common and common equivalent shares outstanding during the period, calculated using the treasury stock method for stock options. Under the treasury stock method, assumed proceeds include the amount the employee must pay for exercising stock options, the amount of compensation cost for future services that the Company has not yet recognized and the amount of tax benefits that would be recorded in additional paid-in capital when the award becomes deductible. Common equivalent shares are excluded from the computation in periods in which they have an anti-dilutive effect. Stock options for which the exercise price exceeds the average market price over the period are anti-dilutive and are excluded from the calculation.

The following table summarizes the calculation of net income per share for the periods indicated (in thousands, except per share amounts):

	Three Months Ended		Six Months Ended	
	November 24, 2012	November 26, 2011	November 24, 2012	November 26, 2011
Net income	\$ 5,864	\$ 25,321	\$ 10,696	\$ 27,917
Basic:				
Weighted average shares	41,292	43,760	41,506	44,468
Diluted:				
Weighted average shares	41,292	43,760	41,506	44,468
Potentially dilutive shares	67	37	61	44
Total dilutive shares	41,359	43,797	41,567	44,512
Net income per common share:				
Basic	\$ 0.14	\$ 0.58	\$ 0.26	\$ 0.63
Dilutive	\$ 0.14	\$ 0.58	\$ 0.26	\$ 0.63
Anti-dilutive shares not included above	7,901	8,156	8,130	8,258

Stock-Based Compensation

The Company recognizes compensation expense for all share-based payment awards made to employees and directors, including employee stock options and employee stock purchases made via the Company’s Employee Stock Purchase Plan (the “ESPP”), based on estimated fair value at the date of grant (options) or date of purchase (ESPP).

The Company estimates the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods. Stock options vest over four years and restricted stock award vesting is determined on an individual grant basis under the Company’s 2004 Performance Incentive Plan (“2004 Plan”). The Company determines the estimated value of stock options using the Black-Scholes valuation model. The Company recognizes stock-based compensation expense on a straight-line basis over the service period for options that are expected to vest and records adjustments to compensation expense at the end of the service period if actual forfeitures differ from original estimates.

See Note 8 — *Stock-Based Compensation Plans* for further information on stock-based compensation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although management believes these estimates and assumptions are adequate, actual results could differ from the estimates and assumptions used.

3. Contingent Consideration

On November 20, 2009, the Company acquired certain assets of Sitrick And Company (“Sitrick Co”), a strategic communications firm, and Brincko Associates, Inc. (“Brincko”), a corporate advisory and restructuring firm, through the purchase of all of the outstanding membership interests in Sitrick Brincko Group, a Delaware limited liability company, formed for the purpose of the acquisition, pursuant to a Membership Interest Purchase Agreement by and among the Company, Sitrick Co, Michael S. Sitrick, an individual, Brincko and John P. Brincko, an individual (together with Mr. Sitrick, Sitrick Co and Brincko, the “Sellers”). Prior to the acquisition date, Mr. Sitrick and Nancy Sitrick were the sole shareholders of Sitrick Co and Mr. Brincko was the sole shareholder of Brincko. In addition, on the same date, the Company acquired the personal goodwill of Mr. Sitrick pursuant to a Goodwill Purchase Agreement by and between the Company and Mr. Sitrick (collectively with the Membership Interest Purchase Agreement, the “Acquisition Agreements”). Sitrick Brincko Group is now a wholly-owned subsidiary of the Company. By combining the specialized skill sets of Sitrick Brincko Group with the Company’s existing consultant capabilities, geographic footprint and client base, the Company believes it has increased its ability to assist clients during challenging periods, particularly in the areas of management consulting, corporate advisory, strategic communications and restructuring services. This expected synergy gave rise to goodwill recorded as part of the purchase price of Sitrick Brincko Group.

Contingent consideration may be payable to the Sellers in a lump sum following the fourth anniversary of the acquisition only if the average annual earnings before interest, taxes, depreciation and amortization (“EBITDA”) (calculated from each of the four one-year periods following the acquisition date) of Sitrick Brincko Group exceed \$11.3 million. At the end of the four-year earn-out period, the Company will determine if the average annual EBITDA exceeded \$11.3 million; if so, the contingent consideration payable is determined by multiplying the average annual EBITDA by 3.15 (representing the agreed upon multiple to be paid by the Company as specified in the Acquisition Agreements). If Sitrick Brincko Group’s annual average EBITDA during the four-year earn-out period exceeds \$11.3 million, the Company may, in its sole discretion, pay up to 50% of any earn-out payment in restricted stock of the Company.

Under accounting rules for business combinations, obligations that are contingently payable based upon the occurrence of one or more future events are to be estimated and recorded as a discounted liability on the Company’s balance sheet even though the consideration is based on future events. On November 28, 2009, the Company estimated the fair value of the obligation to pay contingent consideration based on a number of different projections of the average EBITDA during the four-year earn-out measurement period and then assigned a probability weight to each scenario. In accordance with the Acquisition Agreements, the resultant probability-weighted average EBITDA amounts were then multiplied by 3.15. Because the contingent consideration is not subject to a ceiling and future EBITDA of Sitrick Brincko Group is theoretically unlimited, the range of the undiscounted amounts the Company could be obligated to pay as contingent consideration under the earn-out arrangement is between \$0 and an unlimited amount.

Each reporting period, the Company estimates changes in the fair value of contingent consideration and any change in fair value will be recognized as a non-cash adjustment (with related income tax adjustment) in the Company’s Consolidated Statements of Operations. The Sitrick Brincko Group earn-out liability is based upon an assessment of actual EBITDA of Sitrick Brincko Group through the evaluation date and an updated assessment of various probability weighted projected EBITDA scenarios over the remaining earn-out period. The total adjustment potentially recorded each quarter is a combination of the assessment of actual and projected EBITDA scenarios as well as changes in the discount rate and time value of money each reporting period. An increase in the earn-out expected to be paid will result in a charge to operations in the quarter that the anticipated fair value of contingent consideration increases, while a decrease in the earn-out expected to be paid will result in a credit to operations in the quarter that the anticipated fair value of contingent consideration decreases.

Sitrick Brincko Group’s average EBITDA for the first three annual measurement periods was \$6.1 million, approximately \$5.2 million below the required \$11.3 million base. Based upon the first three years of actual results and the Company’s updated probability weighted assessment of various projected EBITDA scenarios for the one year remaining in the earn-out period, the Company believes it is more likely than not that there will not be a contingent consideration payment due in November 2013. The estimated fair value of the contingent consideration liability was reduced to zero during the quarter ended November 26, 2011.

In the event that the contingent consideration is not paid at the conclusion of the earn-out period, Mr. Brincko will be entitled to receive a cash payment of \$2,250,000, subject to his employment in good standing with the Company as defined. As a result of the Company’s determination that it is more likely than not that the contingent consideration will not be earned, this amount will be recognized as a selling, general and administrative expense over the remaining service period from the time it was estimated that no contingent consideration will be due.

The estimate of the fair value of contingent consideration requires very subjective assumptions to be made of various potential operating result scenarios and discount rates. Although the Company believes that there will be no earn-out payment due in November 2013, it will continue to periodically review actual EBITDA results and an updated assessment of various probability weighted projected EBITDA scenarios of Sitrick Brincko Group; if circumstances change and the Company determines that an earn-out payment may be due, such future revisions would materially change the estimate of the fair value of contingent consideration and therefore materially affect the Company’s future financial results.

[Table of Contents](#)

In addition, under the terms of the Acquisition Agreements, up to 20% of the contingent consideration is payable to the employees of Sitrick Brincko Group at the end of the measurement period to the extent certain EBITDA growth targets are met. The Company records the estimated amount of the contractual obligation to pay the employee portion of contingent consideration as compensation expense over the service period as it is deemed probable that the growth targets will be achieved. As a result of the Company's determination that it is more likely than not that the contingent consideration will not be earned as of November 2013, the Company has no accrual for the employee portion of contingent consideration as of November 24, 2012. The estimate of the amount of the employee portion of contingent consideration payable requires very subjective assumptions to be made of future operating results. Future revisions to these assumptions could materially change the estimate of the amount of the employee portion of contingent consideration and, therefore, materially affect the Company's future financial results.

4. Intangible Assets and Goodwill

The following table presents details of our intangible assets, estimated lives and related accumulated amortization (in thousands):

	As of November 24, 2012			As of May 26, 2012		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net

Non-compete agreements (1-5 years)	3,226	(2,031)	1,195	3,216	(1,721)	1,495
Trade name and trademark (5 years)	1,281	(725)	556	1,281	(605)	676
Total	\$24,803	\$ (21,379)	\$ 3,424	\$24,596	\$ (20,364)	\$ 4,232

The following table summarizes amortization expense for the three and six months ended November 24, 2012 and November 26, 2011 and the expected amount of intangible asset amortization expense (based on existing intangible assets) for the years ending May 25, 2013, May 31, 2014, May 30, 2015, May 28, 2016 and May 27, 2017 (in thousands):

	Three Months Ended		Six Months Ended	
	November 24, 2012	November 26, 2011	November 24, 2012	November 26, 2011
Amortization expense	\$ 434	\$ 1,186	\$ 860	\$ 2,394

	Fiscal Years Ending				
	2013	2014	2015	2016	2017
Expected amortization expense	\$1,681	\$1,643	\$879	\$—	\$—

These estimates do not incorporate the impact that currency fluctuations may cause when translating the financial results of the Company's international operations that have amortizable intangible assets into U.S. dollars. The fluctuation in the gross balance of intangible assets reflects the impact of currency fluctuations between fiscal 2013 and 2012 in translating the intangible balances recorded on the Company's international operations financial statements.

The following table summarizes the activity in the Company's goodwill balance (in thousands):

	For the Six Months Ended	
	November 24, 2012	November 26, 2011
Goodwill, beginning of year	\$ 173,576	\$ 176,475
Impact of foreign currency exchange rate changes	705	(1,700)
Goodwill, end of period	\$ 174,281	\$ 174,775

5. Income Taxes

The Company's provision for income taxes was \$5.4 million (effective tax rate of approximately 48%) and \$18.0 million (effective tax rate of approximately 42%) for the three months ended November 24, 2012 and November 26, 2011, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations which span numerous tax jurisdictions.

In the second quarter of fiscal 2012, the provision increased compared to the same period in fiscal 2013 because of the increase in pre-tax income resulting from the adjustment of estimated fair value of contingent consideration for which a related deferred tax asset had previously been established (\$13.4 million). The provision for income taxes in the second quarter of fiscal 2013 and 2012 also results from taxes on income in the United States and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. The period to period increase in the effective tax rate results primarily from a reduction in pretax losses in certain foreign jurisdictions in which no tax benefits are recorded as well as the contingent consideration adjustment.

In addition, the inability to benefit from losses in jurisdictions with a full valuation allowance and the unpredictability of the timing and amount of eligible disqualifying incentive stock option ("ISO") exercises impact the Company's effective tax rate. The Company cannot recognize a tax benefit for the stock compensation expense related to certain ISO exercises unless and until the holder exercises his or her option and then sells the shares within a certain period of time. Also, the Company can only recognize a potential tax benefit for employees' acquisition and subsequent sale of shares purchased through the ESPP if the sale occurs within a certain defined period. Further, tax benefits associated with ISO grants fully vested at the date of adoption of current accounting rules for stock-based compensation will be recognized as additions to paid-in capital when and if those options are exercised and not as a reduction to the Company's tax provision. The Company recognized a benefit of approximately \$540,000 and \$545,000 related to stock-based compensation for nonqualified stock options expensed and for eligible disqualifying ISO exercises during the second quarter of fiscal 2013 and 2012, respectively.

6. Stockholders' Equity

In April 2011, the Company's board of directors approved a stock repurchase program, authorizing the repurchase, at the discretion of the Company's senior executives, of the Company's common stock for an aggregate dollar limit not to exceed \$150 million. During the three and six months ended November 24, 2012, the Company purchased approximately 545,000 and 1.3 million shares of its common stock at an average price of \$12.79 and \$12.14 per share, respectively, on the open market for approximately \$7.0 million and \$15.9 million, respectively. As of November 24, 2012, approximately \$90.9 million remains available for future repurchases of our common stock under the stock repurchase program.

7. Supplemental Disclosure of Cash Flow Information

Additional information regarding cash flows is as follows (in thousands):

	For the Three Months Ended	
	November 24, 2012	November 26, 2011
Non-cash financing activities:		
Dividends declared, not paid	\$ 2,460	\$ 2,158

8. Stock-Based Compensation Plans

Stock Options and Restricted Stock

As of November 24, 2012, the Company had outstanding grants under the 2004 Plan and the 1999 Long Term Incentive Plan ("1999 Plan"). The 2004 Plan serves as the successor to the 1999 Plan. At inception, a total of 7,500,000 new shares of common stock were made available for awards under the 2004 Plan to employees and non-employee directors. Awards under the 2004 Plan may include, but are not limited to, stock options and restricted stock grants. Outstanding awards under the 1999 Plan that expire or terminate without having been exercised roll over to the 2004 Plan. Stock options generally vest in equal annual installments over four years and terminate ten years from the dates of grant. Restricted stock award vesting is determined on an individual grant basis. As of November 24, 2012, 1,564,000 shares were available for future award grants under the 2004 Plan, although awards of restricted stock under the 2004 Plan will be counted against the available share limit as two and a half shares for every one share actually issued in connection with the award. The Company's policy is to issue shares from its authorized shares upon the exercise of stock options.

[Table of Contents](#)

The following table summarizes the stock option activity for the six months ended November 24, 2012 (number of options and intrinsic value in thousands):

	Number of Shares Under Option	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at May 26, 2012	8,597	\$ 19.53	5.73	\$ 924
Granted, at fair market value	92	12.77		
Exercised	(112)	8.33		
Forfeited	(347)	19.34		
Outstanding at November 24, 2012	<u>8,230</u>	<u>\$ 19.61</u>	<u>5.32</u>	<u>\$ 325</u>
Exercisable at November 24, 2012	<u>5,812</u>	<u>\$ 21.34</u>	<u>4.03</u>	<u>\$ 233</u>

Stock-Based Compensation Expense

As of November 24, 2012, there was \$10.9 million of total unrecognized compensation cost related to non-vested employee stock options granted. That cost is expected to be recognized over a weighted-average period of 29 months. Stock-based compensation expense included in selling, general and administrative expenses for the three months ended November 24, 2012 and November 26, 2011 was \$1.8 million and \$1.9 million, respectively, and for the six months ended November 24, 2012 and November 26, 2011 was \$3.6 million and \$3.8 million, respectively; this consisted of stock-based compensation expense related to employee stock options, employee stock purchases made via the Company's ESPP and issuances of restricted stock. There were no capitalized share-based compensation costs during the six months ended November 24, 2012 and November 26, 2011.

The weighted average estimated fair value per share of employee stock options granted during the three months ended November 24, 2012 was \$4.64 using the Black-Scholes model with the following assumptions:

	<u>Three Months Ended November 24, 2012</u>
Expected volatility	46.9%
Risk-free interest rate	0.7%
Expected dividends	1.9%
Expected life	5.2 years

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, which is the difference between the Company's closing stock price on the last trading day of the second quarter of fiscal 2013 and the exercise price multiplied by the number of shares that would have been received by the option holders if they had exercised their "in the money" options on November 24, 2012. This amount will change based on the fair market value of the Company's common stock. The aggregate intrinsic value of stock options exercised for the six months ended November 24, 2012 and November 26, 2011 was \$434,000 and \$9,500, respectively.

The Company granted no shares of restricted stock during each of the six months ended November 24, 2012 and November 26, 2011. Stock-based compensation expense for restricted shares for the three months ended November 24, 2012 and November 26, 2011 was \$65,000 and \$45,000, respectively, and for the six months ended November 24, 2012 and November 26, 2011 was \$127,000 and \$90,000, respectively. There were 58,540 unvested restricted shares, with approximately \$594,000 of total unrecognized compensation cost, as of November 24, 2012.

The Company recognizes compensation expense for only the portion of stock options and restricted stock units that are expected to vest, rather than recording forfeitures when they occur. If the actual number of forfeitures differs from that estimated by management, additional adjustments to compensation expense may be required in future periods.

The Company reflects, in its Statements of Cash Flows, the tax impact resulting from tax deductions in excess of expense recognized in its Statements of Operations as a financing cash flow, which will impact the Company's future reported cash flows from operating activities. Gross excess tax benefits totaled \$12,000 for both the six months ended November 24, 2012 and November 26, 2011.

Employee Stock Purchase Plan

The Company's ESPP allows qualified employees (as defined in the ESPP) to purchase designated shares of the Company's common stock at a price equal to 85% of the lesser of the fair market value of common stock at the beginning or end of each semi-annual stock purchase period. A total of 4,400,000 shares of common stock may be issued under the ESPP. The Company issued 228,000 and 430,000 shares of common stock pursuant to the ESPP for the six months ended November 24, 2012 and the year ended May 26, 2012, respectively. There were 969,000 shares of common stock available for issuance under the ESPP as of November 24, 2012.

9. Segment Information and Enterprise Reporting

The Company discloses information regarding operations outside of the U.S. The Company operates as one segment. The accounting policies for the domestic and international operations are the same as those described in Note 2-*Summary of Significant Accounting Policies* in the Notes to Consolidated Financial Statements included in the Company's 2012 Annual Report on Form 10-K for the fiscal year ended May 26, 2012. Summarized information regarding the Company's domestic and international operations is shown in the following table (in thousands):

	Revenue for the Three Months Ended		Revenue for the Six Months Ended		Long-Lived Assets (1) as of	
	November 24, 2012	November 26, 2011	November 24, 2012	November 26, 2011	November 24, 2012	May 26, 2012
United States	\$ 105,866	\$ 102,868	\$ 210,656	\$ 203,123	\$ 172,914	\$174,014
The Netherlands	6,543	8,592	12,370	16,623	22,925	22,799
Other	28,788	33,495	55,104	63,216	3,622	3,646
Total	<u>\$ 141,197</u>	<u>\$ 144,955</u>	<u>\$ 278,130</u>	<u>\$ 282,962</u>	<u>\$ 199,461</u>	<u>\$200,459</u>

(1) Long-lived assets are comprised of goodwill, intangible assets, building and land, furniture, leasehold improvements, computers, equipment and software.

10. Legal Proceedings

The Company is involved in certain legal matters in the ordinary course of business. In the opinion of management, all such matters, if disposed of unfavorably, would not have a material adverse effect on the Company's financial position, cash flows or results of operations.

11. Recent Accounting Pronouncements

Testing Indefinite-Lived Intangible Assets for Impairment. In July 2012, the Financial Accounting Standards Board ("FASB") issued new guidance for annual and interim indefinite-lived intangible asset impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The guidance allows an organization the option of first assessing qualitative factors to determine if a quantitative impairment test of the indefinite-lived intangible asset is necessary. If the qualitative assessment reveals that it is more likely than not that the asset is impaired, a calculation of the asset's fair value is required. The Company does not expect that adoption of this guidance will have a material impact on the Company's consolidated financial statements.

Testing Goodwill for Impairment. In September 2011, the FASB issued revised authoritative guidance for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The guidance allows an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment for a reporting unit. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the quantitative two-step impairment test is unnecessary. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

Comprehensive Income. In June 2011, the FASB issued new guidance on the presentation of comprehensive income which requires a company to present components of net income and other comprehensive income in one continuous statement or in two separate, but consecutive statements. There are no changes to the components that are recognized in net income or other comprehensive income under current GAAP. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. Except for the inclusion of the new Consolidated Statements of Comprehensive Income, the adoption of this guidance did not have an impact on the Company's consolidated financial statements.

[Table of Contents](#)

Fair Value Measurements and Disclosures. In May 2011, the FASB issued guidance to amend certain measurement and disclosure requirements related to fair value measurements to improve consistency with international reporting standards. This guidance is effective prospectively for public entities for interim and annual reporting periods beginning after December 15, 2011. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants and the SEC did not, or are not expected to, have a material effect on the Company's results of operations or financial position.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our financial statements and related notes. This discussion and analysis contains "forward-looking statements," within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to expectations concerning matters that are not historical facts. Such forward-looking statements may be identified by words such as "anticipates," "believes," "can," "continue," "could," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "remain," "should," or "will" or the negative of these terms or other comparable terminology. These statements, and all phases of our operations, are subject to known and unknown risks, uncertainties and other factors, some of which are identified in Part II Item 1A Risk Factors below and in our report on Form 10-K for the year ended May 26, 2012 (File No. 0-32113). Readers are cautioned not to place undue reliance on these forward-looking statements. Our actual results, levels of activity, performance or achievements and those of our industry may be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. We undertake no obligation to update the forward-looking statements in this filing. References in this filing to "Resources Connection," "Resources Global Professionals," "Resources Global," the "Company," "we," "us," and "our" refer to Resources Connection, Inc. and its subsidiaries.

Overview

Resources Global is a multinational professional services firm that provides its global client base with experienced professionals specializing in accounting, finance, risk management and internal audit, corporate advisory, strategic communications and restructuring, information management, human capital, supply chain management, healthcare solutions, actuarial, legal and regulatory services in support of client-led projects, interim needs and consulting initiatives. We assist our clients with discrete projects requiring specialized expertise in numerous areas, including:

- finance and accounting services, such as financial analyses (e.g., product costing and margin analyses), budgeting and forecasting, audit preparation, public-entity reporting, tax-related projects, mergers and acquisitions due diligence, initial public offering assistance and assistance in the preparation or restatement of financial statements;
- information management services, such as financial system/enterprise resource planning implementation and post implementation optimization;
- corporate advisory, strategic communications and restructuring services;
- corporate governance, risk management, internal audit co-sourcing and compliance efforts under the Sarbanes-Oxley Act of 2002 ("Sarbanes") or the Dodd-Frank Wall Street Reform and Consumer Protection Act;
- supply chain management services, such as strategic sourcing efforts, contract negotiations and purchasing strategy;
- actuarial services for pension and life insurance companies;
- human capital services, such as change management and compensation program design and implementation;
- legal and regulatory services, such as providing attorneys, paralegals and contract managers to assist clients (including law firms) with project-based or peak period needs; and
- healthcare solutions and consulting services.

We were founded in June 1996 by a team at Deloitte, led by our chief executive officer, Donald B. Murray, who was then a senior partner with Deloitte. Our founders created Resources Connection to capitalize on the increasing demand for high quality outsourced professional services. We operated as a part of Deloitte from our inception in June 1996 until April 1999. In April 1999, we completed a management-led buyout in partnership with several investors. In December 2000, we completed our initial public offering of common stock and began trading on the NASDAQ Stock Market. We currently trade on the NASDAQ Global Select Market. In January 2005, we announced the change of our operating entity name to Resources Global Professionals to better reflect the Company's multinational capabilities.

We operated solely in the United States until fiscal year 2000, when we opened our first three international offices and began to expand geographically to meet the demand for project professional services across the world. As of November 24, 2012, we served clients from offices in 21 countries, including 27 international offices and 50 offices in the United States.

Critical Accounting Policies

The following discussion and analysis of our financial condition and results of operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with GAAP in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

[Table of Contents](#)

The following represents a summary of our critical accounting policies, defined as those policies that we believe: (a) are the most important to the portrayal of our financial condition and results of operations and (b) involve inherently uncertain issues that require management's most difficult, subjective or complex judgments.

Valuation of long-lived assets — We assess the potential impairment of long-lived tangible and intangible assets periodically or whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Our goodwill and certain other intangible assets are not subject to periodic amortization. These assets are considered to have an indefinite life and their carrying values are required to be assessed by us for impairment at least annually. Depending on future market values of our stock, our operating performance and other factors, these assessments could potentially result in impairment reductions of these intangible assets in the future and this adjustment may materially affect the Company's future financial results and financial condition.

Contingent consideration — The Company estimates and records the acquisition date fair value of contingent consideration as part of purchase price consideration for acquisitions occurring subsequent to May 30, 2009. In addition, each reporting period, the Company estimates changes in the fair value of contingent consideration and any change in fair value is recognized in the Company's Consolidated Statement of Operations. The estimate of the fair value of contingent consideration requires very subjective assumptions to be made of future operating results, discount rates and probabilities assigned to various potential operating result scenarios. Future revisions to these assumptions could materially change the estimate of the fair value of contingent consideration and therefore materially affect the Company's future financial results and financial condition.

Under the terms of our Acquisition Agreements for Sitrick Brincko Group, the Sellers have the opportunity to receive contingent consideration subsequent to the fourth anniversary (November 2013) of the acquisition, provided that Sitrick Brincko Group's average annual EBITDA over a period of four years following the acquisition date exceeds \$11.3 million. The range of undiscounted amounts the Company could be obligated to pay as contingent consideration under the earn-out arrangement is between \$0 and an unlimited amount. At the date of acquisition, the Company determined the fair value of the obligation to pay contingent consideration based on probability-weighted projections of the average EBITDA during the four year earn-out measurement period. The resultant probability-weighted average EBITDA amounts were then multiplied by 3.15 (representing the agreed upon multiple to be paid by the Company as specified in the Acquisition Agreements) and then discounted using an original discount rate of 1.9%. Each reporting period, the Company estimates changes in the fair value of contingent consideration and any change in fair value will be recognized as a non-cash charge in the Company's Consolidated Statement of Operations. The Sitrick Brincko Group earn-out liability is based upon an assessment of actual EBITDA of Sitrick Brincko Group through the evaluation date and an updated assessment of various probability weighted projected EBITDA scenarios over the remaining earn-out period. As the ultimate estimated liability is also discounted each period from the November 2013 earn-out date, the contingent consideration liability may fluctuate due to changes in the risk-free interest rate used in determining the appropriate discount factor for time value of money purposes. An increase in the earn-out expected to be paid will result in a charge to operations in the quarter that the anticipated fair value of contingent consideration increases, while a decrease in the earn-out expected to be paid will result in a credit to operations in the quarter that the anticipated fair value of contingent consideration decreases. As of November 24, 2012, the Company believes it is more likely than not that there will not be a contingent consideration payment due in November 2013 and, accordingly, there is no liability recorded at that date or any adjustment amounts recorded in the Company's Consolidated Statement of Operations for the three and six months ended November 24, 2012.

In addition, under the terms of our Acquisition Agreements for Sitrick Brincko Group, up to 20% of the contingent consideration is payable to employees of the acquired business at the end of the measurement period to the extent certain EBITDA growth targets are achieved. The Company records the estimated amount of the contractual obligation to pay the employee portion of the contingent consideration as compensation expense over the service period as it is deemed probable that the growth targets will be achieved. The estimate of the amount of the employee portion of contingent consideration requires very subjective assumptions to be made of future operating results. Future revisions to these assumptions could materially change our estimate of the amount of the employee portion of contingent consideration and therefore materially affect the Company's future financial results and financial condition. As of November 24, 2012, the Company believes it is more likely than not that there will not be an employee portion of contingent consideration payment due in November 2013 and, accordingly, there is no liability recorded at that date.

Allowance for doubtful accounts — We maintain an allowance for doubtful accounts for estimated losses resulting from our clients failing to make required payments for services rendered. We estimate this allowance based upon our knowledge of the financial condition of our clients (which may not include knowledge of all significant events), review of historical receivable and reserve trends and other pertinent information. While such losses have historically been within our expectations and the provisions established, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. A significant change in the liquidity or financial position of our clients could cause unfavorable trends in receivable collections and additional allowances may be required. These additional allowances could materially affect the Company's future financial results.

Table of Contents

Income taxes — In order to prepare our Consolidated Financial Statements, we are required to make estimates of income taxes, if applicable, in each jurisdiction in which we operate. The process incorporates an assessment of any current tax exposure together with temporary differences resulting from different treatment of transactions for tax and financial statement purposes. These differences result in deferred tax assets and liabilities that are included in our Consolidated Balance Sheets. The recovery of deferred tax assets from future taxable income must be assessed and, to the extent recovery is not likely, we will establish a valuation allowance. An increase in the valuation allowance results in recording additional tax expense and any such adjustment may materially affect the Company's future financial results. If the ultimate tax liability differs from the amount of tax expense we have reflected in the Consolidated Statements of Operations, an adjustment of tax expense may need to be recorded and this adjustment may materially affect the Company's future financial results and financial condition.

Revenue recognition — We primarily charge our clients on an hourly basis for the professional services of our consultants. We recognize revenue once services have been rendered and invoice the majority of our clients in the United States on a weekly basis. Some of our clients served by our international operations are billed on a monthly basis. Our clients are contractually obligated to pay us for all hours billed. To a much lesser extent, we also earn revenue if a client hires one of our consultants. This type of contractually non-refundable revenue is recognized at the time our client completes the hiring process.

Stock-based compensation — Under our 2004 Plan, officers, employees, and outside directors have received or may receive grants of restricted stock, stock units, options to purchase common stock or other stock or stock-based awards. Under our ESPP, eligible officers and employees may purchase our common stock in accordance with the terms of the plan.

The Company estimates a value for employee stock options on the date of grant using an option-pricing model. We have elected to use the Black-Scholes option-pricing model which takes into account assumptions regarding a number of highly complex and subjective variables. These variables include the expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Additional variables to be considered are the expected term, expected dividends and the risk-free interest rate over the expected term of our employee stock options. In addition, because stock-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it is reduced for estimated forfeitures. Forfeitures must be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures are estimated based on historical experience. If facts and circumstances change and we employ different assumptions in future periods, the compensation expense recorded may differ materially from the amount recorded in the current period.

The Company uses its historical volatility over the expected life of the stock option award to estimate the expected volatility of the price of its common stock. The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of our employee stock options. The impact of expected dividends (currently \$0.06 per share) is also incorporated in determining the estimated value per share of employee stock option grants. The Company's historical expected life of stock options is 5.2 years for non-officers and 7.2 years for officers. The Company uses its historical volatility over the expected life of the stock option award to estimate the expected volatility of the price of its common stock. The Company reviews the underlying assumptions related to the grant date fair value of stock-based awards at least annually.

We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

Results of Operations

The following tables set forth, for the periods indicated, our Consolidated Statements of Operations data. These historical results are not necessarily indicative of future results.

	For the Three Months Ended		For the Six Months Ended	
	November 24, 2012	November 26, 2011	November 24, 2012	November 26, 2011
	(Amounts in thousands)		(Amounts in thousands)	
Revenue	\$ 141,197	\$ 144,955	\$ 278,130	\$ 282,962
Direct cost of services	85,987	90,034	169,531	175,869
Gross margin	55,210	54,921	108,599	107,093
Selling, general and administrative expenses	42,342	42,980	84,402	85,589
Employee portion of contingent consideration	—	(500)	—	(500)

Income before provision for income taxes	11,312	43,289	21,072	50,183
Provision for income taxes	5,448	17,968	10,376	22,266
Net income	\$ 5,864	\$ 25,321	\$ 10,696	\$ 27,917

[Table of Contents](#)

We also assess the results of our operations using EBITDA as well as Adjusted EBITDA. EBITDA is defined as our earnings before interest, taxes, depreciation and amortization. We define Adjusted EBITDA as EBITDA plus stock-based compensation expense and contingent consideration adjustments (“Adjusted EBITDA”). Adjusted EBITDA Margin is calculated by dividing Adjusted EBITDA by revenue. These measures assist management in assessing our core operating performance. The following table presents EBITDA and Adjusted EBITDA results for the periods indicated and includes a reconciliation of such measures to net income, the most directly comparable GAAP financial measure:

	<u>For the Three Months Ended</u>		<u>For the Six Months Ended</u>	
	<u>November 24,</u> <u>2012</u>	<u>November 26,</u> <u>2011</u>	<u>November 24,</u> <u>2012</u>	<u>November 26,</u> <u>2011</u>

The financial measures and key performance indicators we use to assess our financial and operating performance above are not defined by, or calculated in accordance with, GAAP. A non-GAAP financial measure is defined as a numerical measure of a company’s financial performance that (i) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the comparable measure calculated and presented in accordance with GAAP in the statement of operations; or (ii) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the comparable measure so calculated and presented.

Adjusted EBITDA and Adjusted EBITDA Margin are non-GAAP financial measures. We believe that Adjusted EBITDA and Adjusted EBITDA Margin provide useful information to our investors because they are financial measures used by management to assess the core performance of the Company. Adjusted EBITDA and Adjusted EBITDA Margin are not measurements of financial performance or liquidity under GAAP and should not be considered in isolation or construed as substitutes for net income or other cash flow data prepared in accordance with GAAP for purposes of analyzing our profitability or liquidity. These measures should be considered in addition to, and not as a substitute for, net income, earnings per share, cash flows or other measures of financial performance prepared in conformity with GAAP.

Further, Adjusted EBITDA and Adjusted EBITDA Margin have the following limitations:

- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future and Adjusted EBITDA does not reflect any cash requirements for such replacements;
- Equity based compensation is an element of our long-term incentive compensation program, although we exclude it as an expense when evaluating our ongoing operating performance for a particular period; and
- Other companies in our industry may calculate Adjusted EBITDA and Adjusted EBITDA Margin differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, Adjusted EBITDA and Adjusted EBITDA Margin should not be considered a substitute for performance measures calculated in accordance with GAAP.

Three Months Ended November 24, 2012 Compared to Three Months Ended November 26, 2011

Computations of percentage change period over period are based upon our results, as rounded and presented herein.

Revenue . Revenue decreased \$3.8 million, or 2.6%, to \$141.2 million for the three months ended November 24, 2012 from \$145.0 million for the three months ended November 26, 2011. We deliver our services to clients in a similar fashion across the globe. We believe clients engage us to help implement initiatives to improve efficiencies within their organizations and this can lead to improved awareness of our service offerings through completed and on-going engagements. In the second quarter of fiscal 2013, revenue increased in North America over the amount for the second quarter of fiscal 2012 but was down in Europe and Asia Pacific. We believe our international operations continue to be impacted by the global economic uncertainty, particularly in Europe; European results also were impacted by the strengthening dollar during the most recent quarter as compared to the prior year. We also estimate the known financial impact of Superstorm Sandy at approximately \$1.0 million in lost revenue during the quarter as many of our consultants in our northeast offices were unable to work during the week following the storm. The additional financial impact of Sandy on our operations is difficult to measure as we lost a week or more in marketing efforts to sell new work or refer new work out of the impacted areas.

The number of hours worked in the second quarter of fiscal 2013 decreased about 1.0% compared with the prior year second quarter while average bill rates declined about 1.6%, partially attributable to the impact of unfavorable currency rate changes between the second quarter of this year and last year. In addition, the revenue decrease in the quarter is partially attributable to client reimbursement revenue which declined approximately 15% compared with the prior year's second quarter. The number of consultants on assignment as of November 24, 2012 was 2,358 compared to 2,359 consultants engaged as of November 26, 2011.

We operated 77 (27 abroad) and 80 (29 abroad) offices as of November 24, 2012 and November 26, 2011, respectively; the decrease quarter-over-quarter is because we consolidated certain offices in contiguous areas. Determining future demand levels for our services is difficult given that our clients do not sign long-term contracts with us. In addition, it is inherently difficult to predict economic trends and their impact on our operations and our future results cannot be reliably predicted by considering past trends.

Revenue for the Company's practice areas across the globe consisted of the following (amounts in thousands):

	Revenue for the Three Months Ended			% of Total	
	November 24, 2012	November 26, 2011	% Change	November 24, 2012	November 26, 2011
North America	\$ 108,978	\$ 106,535	2.3%	77.2%	73.5%
Europe	22,701	28,353	(19.9%)	16.1%	19.6%
Asia Pacific	9,518	10,067	(5.5%)	6.7%	6.9%
Total	\$ 141,197	\$ 144,955	(2.6%)	100.0%	100.0%

Our financial results are subject to fluctuations in the exchange rates of foreign currencies in relation to the United States dollar. Revenues denominated in foreign currencies are translated into United States dollars at the average exchange rates in effect during the quarter. Thus, as the value of the United States dollar fluctuates relative to the currencies in our non-U.S. based operations, our revenue can be impacted. Using the comparable fiscal 2012 conversion rates, international revenues would have been higher than reported under GAAP by \$972,000 in the second quarter of fiscal 2013.

Direct Cost of Services. Direct cost of services decreased \$4.0 million, or 4.4%, to \$86.0 million for the three months ended November 24, 2012 from \$90.0 million for the three months ended November 26, 2011. The decrease was partially attributable to the impact of the strengthening U.S. dollar against currencies in countries in which we operate during the most recent quarter as compared to the prior year (the currency fluctuation also contributed to the 4.5% decrease between the two periods in the average pay rate per hour to our consultants). Client reimbursable expenses also declined about 16%. The number of hours worked also decreased 1.0% in the second quarter of fiscal 2013 as compared to the same period of fiscal 2012. The direct cost of services percentage of revenue was 60.9% and 62.1% for the three months ended November 24, 2012 and November 26, 2011, respectively. The improvement in the direct cost of services percentage between the quarters resulted from the current quarter favorable change in the bill rate/pay rate ratio and to a lesser extent the decrease in the amount of zero gross margin client reimbursements.

Our target direct cost of services percentage is 60% for all of our offices.

Selling, General and Administrative Expenses. Selling, general and administrative expenses ("S, G & A") as a percentage of revenue was 30.0% and 29.7% for the quarters ended November 24, 2012 and November 26, 2011, respectively. S, G & A decreased \$700,000, or 1.6%, to \$42.3 million for the three months ended November 24, 2012 from \$43.0 million for the three months ended November 26, 2011.

The decrease quarter-over-quarter is primarily related to the impact of currency exchange rates between the two periods. Management and administrative headcount decreased from 716 at the end of the second quarter of fiscal 2012 to 700 at the end of the second quarter of fiscal 2013.

[Table of Contents](#)

Sequential Operations. On a sequential quarter basis, fiscal 2013 second quarter revenues increased approximately 3.1%, from \$136.9 million to \$141.2 million, primarily attributable to the increase in billable hours between the two periods as less vacation time is taken in the current quarter by our consultants than during the summer holiday season (which coincides with our first fiscal quarter). Billable hours worked increased 2.3%; bill rates improved 0.8%. The Company's sequential revenue increased in North America (1.0%) and Europe (19.5%) but decreased in Asia Pacific (5.0%). The direct cost of services percentage of revenue decreased slightly from 61.0% in the first quarter of fiscal 2013 to 60.9% in the second quarter of fiscal 2013. The Company believes the direct cost of services percentage will increase in the third quarter due to the impact of the winter holidays and the calendar year resetting of payroll taxes on January 1. The ratio of S, G & A to revenue decreased from 30.7% for the quarter ended August 25, 2012 to 30.0% for the quarter ended November 24, 2012, due to improved leverage as a result of higher revenue in the second quarter of fiscal 2013.

Employee Portion of Contingent Consideration and Contingent Consideration Adjustment. As further described in "Critical Accounting Policies—Contingent Consideration" above, estimates related to the employee portion of contingent consideration and contingent consideration were recorded beginning in fiscal 2010 as a result of management's evaluation of the amount of contingent consideration owed to employees related to the Sitrick Brincko Group acquisition (in the case of the employee portion of contingent consideration) and the change in the estimated fair value of the contingent consideration (in the case of contingent consideration). Based upon the first three years of actual results and the Company's updated probability weighted assessment of various projected EBITDA scenarios used in determining the contingent consideration liability for the one year remaining in the earn-out period, the Company believes it is more likely than not that there will not be a contingent consideration payment due in November 2013 and therefore no amounts are recorded in the Company's Consolidated Statement of Operations for the quarter ended November 24, 2012. In the prior year second quarter, the Company initially determined that it was more likely than not that the Sitrick Brincko Group would not exceed the target average EBITDA of \$11.3 million necessary for an earn-out payment in November 2013, and, based upon this conclusion, reduced the fair value of the estimated liability from \$33.4 million to zero, representing a favorable non-cash adjustment reflected in the Company's Consolidated Statement of Operations (\$20.4 million net of tax, including the employee portion adjustment discussed below). In addition, in the second quarter of fiscal 2012, the Company also reversed its previously recorded estimate of \$500,000 for the employee portion of contingent consideration after determining that it was more likely than not that the earn-out contingent consideration will not be paid.

The estimates of both the employee portion of contingent consideration and contingent consideration payable require very subjective assumptions to be made of various potential operating result scenarios and future revision to these assumptions could materially change the estimate of the amount of either liability and therefore materially affect the Company's future financial results and financial condition.

Amortization and Depreciation Expense. Amortization of intangible assets decreased to \$434,000 for the three months ended November 24, 2012 from \$1.2 million for the three months ended November 26, 2011. The decrease is the result of the completion of amortization on certain identifiable intangible assets between the two periods. Based upon identified intangible assets recorded at November 24, 2012, the Company anticipates amortization expense related to identified intangible assets to approximate \$1.7 million during the fiscal year ending May 25, 2013.

Depreciation expense was \$1.2 million for the three months ended November 24, 2012 compared to \$1.5 million for the three months ended November 26, 2011. Depreciation decreased as a number of assets were fully depreciated during fiscal 2012 and the Company slowed the amount invested in new property and equipment in recent years.

Interest Income. Interest income was \$50,000 in the second quarter of fiscal 2013 compared to \$65,000 in the second quarter of fiscal 2012. The decrease in interest income in the second quarter of fiscal 2013 is primarily the result of lower interest rates available as compared to the prior year's second quarter and, to a lesser extent, lower available cash balances for investment.

The Company has invested available cash in certificates of deposit, money market investments and commercial paper that have been classified as cash equivalents due to the short maturities of these investments. As of November 24, 2012, the Company also has \$20.0 million of investments in commercial paper and certificates of deposit with maturity dates between three months and one year from the balance sheet date classified as short-term investments and considered "held-to-maturity" securities.

Income Taxes. The Company's provision for income taxes was \$5.4 million (effective tax rate of approximately 48%) and \$18.0 million (effective tax rate of approximately 42%) for the three months ended November 24, 2012 and November 26, 2011, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations which span numerous tax jurisdictions.

The provision for income taxes in the second quarter of fiscal 2013 and 2012 results from taxes on income in the United States and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. In addition, the inability to benefit from losses in jurisdictions with a full valuation allowance and the unpredictability of the timing and amount of eligible disqualifying incentive stock option ("ISO") exercises impact the Company's effective tax rate.

[Table of Contents](#)

In addition, in the second quarter of fiscal 2012, the provision also increased because of the increase in pre-tax income resulting from the adjustment of estimated fair value of contingent consideration for which a related deferred tax asset had previously been established (\$13.4 million).

Periodically, the Company reviews the components of both book and taxable income to analyze the adequacy of the tax provision. There can be no assurance, because of the lower benefit from the United States statutory rate for losses in certain foreign jurisdictions, the limitation on the benefit for losses in jurisdictions in which a valuation allowance for operating loss carryforwards has previously been established, and the unpredictability of timing and the amount of eligible disqualifying ISO exercises, that the Company's effective tax rate will remain constant in the future.

The Company cannot recognize a tax benefit for certain ISO grants unless and until the holder exercises his or her option and then sells the shares within a certain period of time. In addition, the Company can only recognize a potential tax benefit for employees' acquisition and subsequent sale of shares purchased through the ESPP if the sale occurs within a certain defined period. As a result, the Company's provision for income taxes is likely to fluctuate from these factors for the foreseeable future. Further, those tax benefits associated with ISO grants fully vested at the date of adoption of the current accounting rules governing stock awards will be recognized as additions to paid-in capital when and if those options are exercised and not as a reduction to the Company's tax provision. The Company recognized a benefit of approximately \$540,000 and \$545,000 related to stock-based compensation for nonqualified stock options expensed and for eligible disqualifying ISO exercises during the second quarter of fiscal 2013 and 2012, respectively. The proportion of expense related to non-qualified stock option grants (for which the Company may recognize a tax benefit in the same quarter as the related compensation expense in most instances) is significant as compared to expense related to ISOs (including ESPPs). However, the timing and amount of eligible disqualifying ISO exercises cannot be predicted. The Company predominantly grants nonqualified stock options to employees in the United States.

Six Months Ended November 24, 2012 Compared to Six Months Ended November 26, 2011

Computations of percentage change period over period are based upon our results, as rounded and presented herein.

Revenue. Revenue decreased \$4.9 million, or 1.7%, to \$278.1 million for the six months ended November 24, 2012 from \$283.0 million for the six months ended November 26, 2011. The number of hours worked in the first six months of fiscal 2013 increased about 0.4% compared with the prior year first six months while average bill rates declined about 1.6%, partially attributable to the impact of unfavorable currency rate changes between the first half of this year and last year. In addition, the revenue decrease in the period is partially attributable to client reimbursement revenue which declined approximately 19% compared with the prior year period.

Revenue for the Company's practice areas across the globe consisted of the following (amounts in thousands):

	Revenue for the Six Months Ended		% Change	% of Total	
	November 24, 2012	November 26, 2011		November 24, 2012	November 26, 2011
North America	\$ 216,925	\$ 210,605	3.0%	78.0%	74.4%
Europe	41,732	51,637	(19.2%)	15.0%	18.3%
Asia Pacific	19,473	20,720	(6.0%)	7.0%	7.3%
Total	<u>\$ 278,130</u>	<u>\$ 282,962</u>	(1.7%)	<u>100.0%</u>	<u>100.0%</u>

Our financial results are subject to fluctuations in the exchange rates of foreign currencies in relation to the United States dollar. Revenues denominated in foreign currencies are translated into United States dollars at the average exchange rates in effect during the period. Thus, as the value of the United States dollar fluctuates relative to the currencies in our non-U.S. based operations, our revenue can be impacted. Using the comparable fiscal 2012 conversion rates, international revenues would have been higher than reported under GAAP by \$3.7 million in the first half of fiscal 2013.

Direct Cost of Services. Direct cost of services decreased \$6.4 million, or 3.6%, to \$169.5 million for the six months ended November 24, 2012 from \$175.9 million for the six months ended November 26, 2011. The decrease was partially attributable to the impact of the strengthening U.S. dollar against currencies in countries in which we operate during the most recent period as compared to the prior year period (the currency fluctuation also contributed to the 3.1% decrease between the two periods in the average pay rate per hour to our consultants). Client reimbursable expenses also declined about 20%. The decrease in rate per hour was offset by an increase in the number of hours worked of 0.4% in the first half of fiscal 2013 as compared to the same period of fiscal 2012. The direct cost of services percentage of revenue was 60.9% and 62.2% for the six months ended November 24, 2012 and November 26, 2011, respectively. The improvement in the direct cost of services percentage between the two periods resulted from the favorable change in the bill rate/pay rate ratio in the first half of fiscal 2013 and the decrease in the amount of zero gross margin client reimbursements.

[Table of Contents](#)

Selling, General and Administrative Expenses. S, G & A as a percentage of revenue was 30.3% and 30.2% for the six months ended November 24, 2012 and November 26, 2011, respectively. S, G & A decreased \$1.2 million, or 1.4%, to \$84.4 million for the six months ended November 24, 2012 from \$85.6 million for the six months ended November 26, 2011.

The decrease period-over-period is primarily related to the impact of currency exchange rates between the two periods.

Employee Portion of Contingent Consideration and Contingent Consideration Adjustment. As further described in “Critical Accounting Policies—Contingent Consideration” above, estimates related to the employee portion of contingent consideration and contingent consideration were recorded beginning in fiscal 2010 as a result of management’s evaluation of the amount of contingent consideration owed to employees related to the Sitrick Brincko Group acquisition (in the case of the employee portion of contingent consideration) and the change in the estimated fair value of the contingent consideration (in the case of contingent consideration). Based upon the first three years of actual results and the Company’s updated probability weighted assessment of various projected EBITDA scenarios used in determining the contingent consideration liability for the one year remaining in the earn-out period, the Company believes it is more likely than not that there will not be a contingent consideration payment due in November 2013 and therefore no amounts are recorded in the Company’s Consolidated Statement of Operations for the six months ended November 24, 2012. In the prior year second quarter, the Company initially determined that it was more likely than not that the Sitrick Brincko Group would not exceed the target average EBITDA of \$11.3 million necessary for an earn-out payment in November 2013, and, based upon this conclusion, reduced the fair value of the estimated liability from \$33.4 million to zero, representing a favorable non-cash adjustment as reflected in the Company’s Consolidated Statement of Operations (\$20.4 million net of tax, including the employee portion adjustment discussed below). In addition, in the second quarter of fiscal 2012, the Company also reversed its previously recorded estimate of \$500,000 for the employee portion of contingent consideration after determining that it was more likely than not that the earn-out contingent consideration will not be paid.

The estimate of both the employee portion of contingent consideration and contingent consideration payable require very subjective assumptions to be made of various potential operating result scenarios and future revision to these assumptions could materially change the estimate of the amount of either liability and therefore materially affect the Company’s future financial results and financial condition.

Amortization and Depreciation Expense. Amortization of intangible assets decreased to \$860,000 for the six months ended November 24, 2012 from \$2.4 million for the six months ended November 26, 2011. The decrease is the result of the completion of amortization on certain identifiable intangible assets between the two periods.

Depreciation expense was \$2.4 million for the six months ended November 24, 2012 compared to \$3.0 million for the six months ended November 26, 2011. Depreciation decreased as a number of assets were fully depreciated during fiscal 2012 and the Company slowed the amount invested in new property and equipment in recent years.

Interest Income. Interest income was \$98,000 in the first half of fiscal 2013 compared to \$153,000 in the first half of fiscal 2012. The decrease in interest income in the first half of fiscal 2013 is primarily the result of lower interest rates available as compared to the prior year’s first half and, to a lesser extent, lower available cash balances for investment.

Income Taxes. The Company’s provision for income taxes was \$10.4 million (effective tax rate of approximately 49%) and \$22.3 million (effective tax rate of approximately 44%) for the six months ended November 24, 2012 and November 26, 2011, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations which span numerous tax jurisdictions.

The provision in the first half of fiscal 2013 and 2012 results from taxes on income in the United States and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. In addition, the inability to benefit from losses in jurisdictions with a full valuation allowance and the unpredictability of the timing and amount of eligible disqualifying ISO exercises impact the Company’s effective tax rate.

In addition, in the first half of fiscal 2012, the provision increased compared to the same period in fiscal 2013 because of the increase in pre-tax income resulting from the adjustment of estimated fair value of contingent consideration for which a related deferred tax asset had previously been established (\$13.4 million).

Comparability of Quarterly Results. Our quarterly results have fluctuated in the past and we believe they will continue to do so in the future. Certain factors that could affect our quarterly operating results are described in Part II, Item 1A—Risk Factors. Due to these and other factors, we believe that quarter-to-quarter comparisons of our results of operations may not be meaningful indicators of future performance.

Liquidity and Capital Resources

Our primary source of liquidity is cash provided by our operations and, historically, to a lesser extent, stock option exercises. On an annual basis, we have generated positive cash flows from operations since inception. Our ability to continue to increase positive cash flow from operations in the future will be, at least in part, dependent on improvement in global economic conditions.

As of November 24, 2012, the Company had \$113.9 million of cash, cash equivalents and short-term investments. The Company has a \$3.0 million unsecured revolving credit facility with Bank of America (the "Credit Agreement"). The Credit Agreement allows the Company to choose the interest rate applicable to advances. The interest rate options are Bank of America's prime rate and a London Inter-Bank Offered Rate plus 2.25%. Interest, if any, is payable monthly. The Credit Agreement expires November 30, 2013. As of November 24, 2012, the Company had approximately \$1.3 million available under the terms of the Credit Agreement as Bank of America has issued approximately \$1.7 million of outstanding letters of credit in favor of third parties related to operating leases. As of November 24, 2012, the Company was in compliance with all covenants included in the Credit Agreement.

Operating activities provided \$5.1 million in cash for the six months ended November 24, 2012 compared to \$7.0 million for the six months ended November 26, 2011. Cash provided by operations in the first six months of fiscal 2013 resulted from net income of \$10.7 million and non-cash items of \$6.6 million, offset by net unfavorable changes in operating assets and liabilities of \$12.2 million. In the first six months of fiscal 2012, cash provided by operations resulted from net income of \$27.9 million offset by unfavorable non-cash items of \$10.6 million and unfavorable net changes in operating assets and liabilities of \$10.3 million. The unfavorable non-cash items in fiscal 2012 included the impact of the reduction of contingent consideration during the period (approximately \$20.4 million net of tax impact). Non-cash items in both years include depreciation and amortization (which decreased between the two periods as several intangible assets became fully amortized in fiscal 2012) and stock-based compensation expense (which decreased between the two periods); these charges do not reflect an actual cash outflow from the Company. The primary operating asset change between the two periods was the increase in accounts receivable as of November 24, 2012 over the balance at May 26, 2012. We believe this increase was caused by processing delays at certain East Coast based clients resulting from the impact of Superstorm Sandy.

Net cash provided by investing activities was \$1.6 million for the first six months of fiscal 2013 compared to net cash used in investing activities of \$7.4 million in the comparable prior year period. Cash from redemption of short-term investments offset cash used to purchase short-term investments (primarily commercial paper) in the first six months of fiscal 2013 by approximately \$3.0 million as compared to purchases of short-term investments exceeding redemption by \$5.7 million in the first six months of fiscal 2012. Purchases of property and equipment decreased approximately \$300,000 between the two periods.

Net cash used in financing activities totaled \$17.5 million for the six months ended November 24, 2012, compared to \$29.2 million for the six months ended November 26, 2011. Proceeds from the exercise of employee stock options and issuance of shares via the Company's ESPP were about \$600,000 higher in fiscal 2013 compared to the same period in fiscal 2012. However, the Company used \$27.5 million in the first six months of fiscal 2012 to purchase approximately 2.5 million shares of its common stock on the open market versus \$15.9 million in the first six months of the current fiscal year to purchase approximately 1.3 million shares. The Company also paid dividends on its common stock of \$4.6 million in the first six months of fiscal 2013, approximately \$600,000 higher than the year before. The Company's board of directors declared a quarterly cash dividend of \$0.06 per common share on October 23, 2012. The dividend of approximately \$2.5 million, paid on December 13, 2012, is accrued in the Company's Consolidated Balance Sheet as of November 24, 2012.

Our ongoing operations and anticipated growth in the geographic markets we currently serve will require us to continue to make investments in office premises and capital equipment, primarily technology hardware and software. In addition, we may consider making strategic acquisitions. We anticipate that our current cash and the ongoing cash flows from our operations will be adequate to meet our working capital and capital expenditure needs for at least the next 12 months. If we require additional capital resources to grow our business, either internally or through acquisition, we may seek to sell additional equity securities or to secure debt financing. The sale of additional equity securities or certain forms of debt financing could result in additional dilution to our stockholders. We may not be able to obtain financing arrangements in amounts or on terms acceptable to us in the future. In the event we are unable to obtain additional financing when needed, we may be compelled to delay or curtail our plans to develop our business or to pay dividends on our capital stock, which could have a material adverse effect on our operations, market position and competitiveness.

Recent Accounting Pronouncements

Information regarding recent accounting pronouncements is contained in Note 11 to the Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rate Risk. As of November 24, 2012, we had approximately \$113.9 million of cash and cash equivalents and short-term investments. Securities that the Company has the ability and positive intent to hold to maturity are carried at amortized cost. These securities consist of commercial paper. Cost approximates market for these securities. The earnings on these investments are subject to changes in interest rates; however, assuming a constant balance available for investment, a 10% decline in interest rates would reduce our interest income but would not have a material impact on our consolidated financial position or results of operations.

Foreign Currency Exchange Rate Risk. For the three months ended November 24, 2012, approximately 25.0% of the Company's revenues were generated outside of the United States. As a result, our operating results are subject to fluctuations in the exchange rates of foreign currencies in relation to the United States dollar. Revenues and expenses denominated in foreign currencies are translated into United States dollars at the average exchange rates prevailing during the period. Thus, as the value of the United States dollar fluctuates relative to the currencies in our non-United States based operations, our reported results may vary.

Assets and liabilities of our non-United States based operations are translated into United States dollars at the exchange rate effective at the end of each monthly reporting period. Approximately 71% of our balances of cash, cash equivalents and short-term investments as of November 24, 2012 were denominated in United States dollars. The remaining 29% was comprised primarily of cash balances translated from Japanese Yen, Hong Kong Dollars, Canadian Dollars or Euros. The difference resulting from the translation each period of assets and liabilities of our non-United States based operations is recorded as a component of stockholders' equity in accumulated other comprehensive loss.

Although we intend to monitor our exposure to foreign currency fluctuations, we do not currently use financial hedging techniques to mitigate risks associated with foreign currency fluctuations, and we cannot assure you that exchange rate fluctuations will not adversely affect our financial results in the future.

ITEM 4. CONTROLS AND PROCEDURES.

As required by Rule 13a-15(b) under the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Exchange Act) as of November 24, 2012. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of November 24, 2012. There was no change in the Company's internal control over financial reporting, as such term is defined in Rule 13a-15(f) promulgated under the Exchange Act, during the Company's quarter ended November 24, 2012 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

We are not a party to any material legal proceedings.

ITEM 1A. RISK FACTORS.

There have been no material changes in our risk factors from those disclosed in Item 1A of our Annual Report on Form 10-K for the fiscal year ended May 26, 2012, which was filed with the Securities and Exchange Commission on July 24, 2012. For convenience, our updated risk factors are included below in this Item 1A. The order in which the risks appear is not intended as an indication of their relative weight or importance.

A future economic downturn or change in the use of outsourced professional services consultants could adversely affect our business.

Beginning in fiscal 2008, the United States economy deteriorated significantly, resulting in a reduction in our revenue as clients delayed, down-sized or cancelled initiatives that required the use of professional services. Subsequently, many European and Asia Pacific countries reported significant contraction in their economies. While economic conditions in many parts of the world began to improve during our fiscal 2011, more recently, there is uncertainty regarding general economic conditions and in particular the economic impact of the continuing fiscal crisis in Europe. Deterioration of the global economy or tightening credit markets, could result in a reduction in the demand for our services and adversely affect our business in the future. In addition, the use of professional services consultants on a project-by-project basis could decline for non-economic reasons. In the event of a reduction in the demand for our consultants, our financial results would suffer.

Economic deterioration in regions in which we operate may also affect our allowance for doubtful accounts. Our estimate of losses resulting from our clients' failure to make required payments for services rendered has historically been within our expectations and the provisions established. However, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. A significant change in the liquidity or financial position of our clients could cause unfavorable trends in receivable collections and cash flows and additional allowances may be required. These additional allowances could materially affect the Company's future financial results.

In addition, we are required to periodically, but at least annually, assess the recoverability of certain assets, including deferred tax assets and goodwill. Softening of the United States economy and international economies could adversely affect our evaluation of the recoverability of deferred tax assets, requiring us to record additional tax valuation allowances. Our assessment of impairment of goodwill is currently based upon comparing our market capitalization to our net book value. Therefore, a significant downturn in the future market value of our stock could potentially result in impairment reductions of goodwill and such an adjustment could materially affect the Company's future financial results and financial condition.

The market for professional services is highly competitive, and if we are unable to compete effectively against our competitors, our business and operating results could be adversely affected.

We operate in a competitive, fragmented market, and we compete for clients and consultants with a variety of organizations that offer similar services. The competition is likely to increase in the future due to the expected growth of the market and the relatively few barriers to entry. Our principal competitors include:

- consulting firms;
- local, regional, national and international accounting firms;
- independent contractors;
- traditional and Internet-based staffing firms; and
- the in-house resources of our clients.

We cannot assure you that we will be able to compete effectively against existing or future competitors. Many of our competitors have significantly greater financial resources, greater revenues and greater name recognition, which may afford them an advantage in attracting and retaining clients and consultants and in offering pricing concessions. Some of our competitors in certain markets do not provide medical and other benefits to their consultants, thereby allowing them to potentially charge lower rates to clients. In addition, our competitors may be able to respond more quickly to changes in companies' needs and developments in the professional services industry.

Our business depends upon our ability to secure new projects from clients and, therefore, we could be adversely affected if we fail to do so.

We do not have long-term agreements with our clients for the provision of services. The success of our business is dependent on our ability to secure new projects from clients. For example, if we are unable to secure new client projects because of improvements in our competitors' service offerings, or because of a change in government regulatory requirements, or because of an economic downturn decreasing the demand for outsourced professional services, our business is likely to be materially adversely affected. New impediments to our ability to secure projects from clients may develop over time, such as the increasing use by large clients of in-house procurement groups that manage their relationship with service providers.

We may be legally liable for damages resulting from the performance of projects by our consultants or for our clients' mistreatment of our consultants.

Many of our engagements with our clients involve projects that are critical to our clients' businesses. If we fail to meet our contractual obligations, we could be subject to legal liability or damage to our reputation, which could adversely affect our business, operating results and financial condition. While we are not currently subject to any client-related legal claims which we believe are significant, it remains possible, because of the nature of our business, that we may be involved in litigation in the future. Claims brought against us could have a serious negative effect on our reputation and on our business, financial condition and results of operations.

Because we are in the business of placing our consultants in the workplaces of other companies, we are subject to possible claims by our consultants alleging discrimination, sexual harassment, negligence and other similar activities by our clients. We may also be subject to similar claims from our clients based on activities by our consultants. The cost of defending such claims, even if groundless, could be substantial and the associated negative publicity could adversely affect our ability to attract and retain consultants and clients.

We may not be able to grow our business, manage our growth or sustain our current business.

Historically, we have grown by opening new offices and by increasing the volume of services provided through existing offices. During the economic slowdown that began during our fiscal 2008, our revenue declined for five consecutive quarters through the first quarter of fiscal 2010. Since then we have experienced a modest growth rate. There can be no assurance that we will be able to maintain or expand our market presence in our current locations or to successfully enter other markets or locations. Our ability to continue to grow our business will depend upon an improving global economy and a number of factors, including our ability to:

- grow our client base;
- expand profitably into new geographies;
- provide additional professional services offerings;
- hire qualified and experienced consultants;
- maintain margins in the face of pricing pressures;
- manage costs; and
- maintain or grow revenues and increase other service offerings from existing clients.

Even if we are able to resume more rapid growth in our revenue, the growth will result in new and increased responsibilities for our management as well as increased demands on our internal systems, procedures and controls, and our administrative, financial, marketing and other resources. For instance, a limited number of clients are requesting that certain engagements be of a fixed fee nature rather than our traditional hourly time and materials approach, thus shifting a portion of the burden of financial risk and monitoring to us. Failure to adequately respond to these new responsibilities and demands may adversely affect our business, financial condition and results of operations.

Our international activities expose us to additional operational challenges that we might not otherwise face.

Our international activities cause us to confront and manage a number of risks and expenses that we would not face if we conducted our operations solely in the United States. Any of these risks or expenses could cause a material negative effect on our operating results. These risks and expenses include:

- difficulties in staffing and managing foreign offices as a result of, among other things, distance, language and cultural differences;
- less flexible labor laws and regulations;
- expenses associated with customizing our professional services for clients in foreign countries;

Table of Contents

- foreign currency exchange rate fluctuations when we sell our professional services in denominations other than United States' dollars;
- protectionist laws and business practices that favor local companies;
- political and economic instability in some international markets;
- multiple, conflicting and changing government laws and regulations;
- trade barriers;
- reduced protection for intellectual property rights in some countries; and
- potentially adverse tax consequences.

We have acquired, and may continue to acquire, companies, and these acquisitions could disrupt our business.

We have acquired several companies and we may continue to acquire companies in the future. Entering into an acquisition entails many risks, any of which could harm our business, including:

- diversion of management's attention from other business concerns;
- failure to integrate the acquired company with our existing business;
- failure to motivate, or loss of, key employees from either our existing business or the acquired business;
- potential impairment of relationships with our employees and clients;
- additional operating expenses not offset by additional revenue;
- incurrence of significant non-recurring charges;
- incurrence of additional debt with restrictive covenants or other limitations;
- addition of significant amounts of intangible assets, including goodwill, that are subject to periodic assessment of impairment, primarily through comparison of market value of our stock to our net book value, with such impairment potentially resulting in a material impact on our future financial results and financial condition;
- dilution of our stock as a result of issuing equity securities; and
- assumption of liabilities of the acquired company.

We must provide our clients with highly qualified and experienced consultants, and the loss of a significant number of our consultants, or an inability to attract and retain new consultants, could adversely affect our business and operating results.

Our business involves the delivery of professional services, and our success depends on our ability to provide our clients with highly qualified and experienced consultants who possess the skills and experience necessary to satisfy their needs. At various times, such professionals can be in great demand, particularly in certain geographic areas. Our ability to attract and retain consultants with the requisite experience and skills depends on several factors including, but not limited to, our ability to:

- provide our consultants with either full-time or flexible-time employment;
- obtain the type of challenging and high-quality projects that our consultants seek;
- pay competitive compensation and provide competitive benefits; and
- provide our consultants with flexibility as to hours worked and assignment of client engagements.

We cannot assure you that we will be successful in accomplishing any of these factors and, even if we are, we cannot guarantee that we will be successful in attracting and retaining the number of highly qualified and experienced consultants necessary to maintain and grow our business.

Decreased effectiveness of equity compensation could adversely affect our ability to attract and retain employees.

We have historically used stock options as a key component of our employee compensation program in order to align employees' interests with the interests of our stockholders, encourage employee retention and provide competitive compensation packages. A significant portion of our options outstanding are priced at more than the current per share market value of our stock, limiting the past several years of option grants as a significant incentive to retain employees.

Our computer hardware and software and telecommunications systems are susceptible to damage and interruption.

The management of our business is aided by the uninterrupted operation of our computer and telecommunication systems. These systems are vulnerable to security breaches, natural disasters, computer viruses, or other interruptions or damage stemming from power outages, equipment failure or unintended usage by employees. System-wide or local failures of these systems could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Our cash and short-term investments are subject to economic risk.

The Company invests its cash, cash equivalents and short-term investments in United States treasuries and government agencies, foreign and domestic bank deposits, money market funds, commercial paper and certificates of deposit. Certain of these investments are subject to general credit, liquidity, market and interest rate risks. In the event these risks caused a decline in value of any of the Company's investments, it could adversely affect the Company's financial condition.

Our business could suffer if we lose the services of one or more key members of our senior management.

Our future success depends upon the continued employment of our senior management team. The departure of one or more key members of our senior management team, including management of Sitrick Brincko Group, could significantly disrupt our operations.

Our quarterly financial results may be subject to significant fluctuations that may increase the volatility of our stock price.

Our results of operations could vary significantly from quarter to quarter. Factors that could affect our quarterly operating results include:

- our ability to attract new clients and retain current clients;
- the mix of client projects;
- the announcement or introduction of new services by us or any of our competitors;
- the expansion of the professional services offered by us or any of our competitors into new locations both nationally and internationally;
- changes in the demand for our services by our clients;
- the entry of new competitors into any of our markets;
- the number of consultants eligible for our offered benefits as the average length of employment with the Company increases;
- the amount of vacation hours used by consultants or number of holidays in a quarter, particularly the day of the week on which they occur;
- changes in the pricing of our professional services or those of our competitors;
- variation in foreign exchange rates from one quarter to the next used to translate the financial results of our international operations;
- the amount and timing of operating costs and capital expenditures relating to management and expansion of our business;
- changes in the estimates of contingent consideration and the employee portion of contingent consideration;
- the timing of acquisitions and related costs, such as compensation charges that fluctuate based on the market price of our common stock; and
- the periodic fourth quarter consisting of 14 weeks, which next occurs during the fiscal year ending May 31, 2014.

In addition, in accordance with generally accepted accounting principles ("GAAP"), we estimate and record the acquisition date fair value of contingent consideration as part of purchase price consideration for acquisitions occurring subsequent to May 30, 2009. Each reporting period, we will estimate changes in the fair value of contingent consideration and any change in fair value will be recognized in our consolidated statement of operations. Our estimate of the fair value of contingent consideration requires very subjective assumptions to be made of future operating results, discount rates and probabilities assigned to various potential operating result scenarios. Future revisions to these assumptions could materially change our estimate of the fair value of contingent consideration and therefore materially affect the Company's future financial results and financial condition.

Under the terms of our acquisition agreements for Sitrick Brincko Group, up to 20% of the contingent consideration is payable to employees of the acquired business at the end of the measurement period to the extent certain growth targets are achieved. We will record the estimated amount of the contractual obligation to pay the employee portion of the contingent consideration as compensation expense over the service period as it is deemed probable that growth targets will be achieved. Our estimate of the amount of the employee portion of contingent consideration requires very subjective assumptions to be made of future operating results. Future revisions to these assumptions could materially change our estimate of the amount of the employee portion of contingent consideration and therefore materially affect the Company's future financial results and financial condition.

Due to these factors, we believe that quarter-to-quarter comparisons of our results of operations are not meaningful indicators of future performance. It is possible that in some future periods, our results of operations may be below the expectations of investors. If this occurs, the price of our common stock could decline.

Table of Contents

If our internal control over financial reporting does not comply with the requirements of Sarbanes, our business and stock price could be adversely affected.

Section 404 of Sarbanes requires us to evaluate periodically the effectiveness of our internal control over financial reporting, and to include a management report assessing the effectiveness of our internal controls as of the end of each fiscal year. Our management report on internal controls is contained in our Annual Report on Form 10-K for the year ended May 26, 2012. Section 404 also requires our independent registered public accountant to report on our internal control over financial reporting.

Our management does not expect that our internal control over financial reporting will prevent all errors or acts of fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, involving us have been, or will be, detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple errors or mistakes. Controls can also be circumvented by individual acts of a person, or by collusion among two or more people, or by management override of controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and we cannot assure you that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies and procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to errors or fraudulent acts may occur and not be detected.

Although our management has determined, and our independent registered public accountant has attested, that our internal control over financial reporting was effective as of May 26, 2012, we cannot assure you that we or our independent registered public accountant will not identify a material weakness in our internal controls in the future. A material weakness in our internal control over financial reporting may require management and our independent registered public accountant to evaluate our internal controls as ineffective. If our internal control over financial reporting is not considered adequate, we may experience a loss of public confidence, which could have an adverse effect on our business and our stock price. Additionally, if our internal control over financial reporting otherwise fails to comply with the requirements of Sarbanes, our business and stock price could be adversely affected.

We may be subject to laws and regulations that impose difficult and costly compliance requirements and subject us to potential liability and the loss of clients.

In connection with providing services to clients in certain regulated industries, such as the gaming and energy industries, we are subject to industry-specific regulations, including licensing and reporting requirements. Complying with these requirements is costly and, if we fail to comply, we could be prevented from rendering services to clients in those industries in the future. Additionally, changes in these requirements, or in other laws applicable to us, in the future could increase our costs of compliance.

In addition, we may face challenges from certain state regulatory bodies governing the provision of certain professional services, like legal services or audit services. The imposition of such regulations could require additional financial and operational burdens on our business.

It may be difficult for a third party to acquire the Company, and this could depress our stock price.

Delaware corporate law and our amended and restated certificate of incorporation and bylaws contain provisions that could delay, defer or prevent a change of control of the Company or our management. These provisions could also discourage proxy contests and make it difficult for you and other stockholders to elect directors and take other corporate actions. As a result, these provisions could limit the price that future investors are willing to pay for your shares. These provisions:

- authorize our board of directors to establish one or more series of undesignated preferred stock, the terms of which can be determined by the board of directors at the time of issuance;
- divide our board of directors into three classes of directors, with each class serving a staggered three-year term. Because the classification of the board of directors generally increases the difficulty of replacing a majority of the directors, it may tend to discourage a third party from making a tender offer or otherwise attempting to obtain control of us and may make it difficult to change the composition of the board of directors;
- prohibit cumulative voting in the election of directors which, if not prohibited, could allow a minority stockholder holding a sufficient percentage of a class of shares to ensure the election of one or more directors;
- require that any action required or permitted to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and may not be effected by any consent in writing;
- state that special meetings of our stockholders may be called only by the chairman of the board of directors, by our chief executive officer, by the board of directors after a resolution is adopted by a majority of the total number of authorized directors, or by the holders of not less than 10% of our outstanding voting stock;

Table of Contents

- establish advance notice requirements for submitting nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting;
- provide that certain provisions of our certificate of incorporation and bylaws can be amended only by supermajority vote (a 66²/₃% majority) of the outstanding shares. In addition, our board of directors can amend our bylaws by majority vote of the members of our board of directors;
- allow our directors, not our stockholders, to fill vacancies on our board of directors; and
- provide that the authorized number of directors may be changed only by resolution of the board of directors.

We are required to recognize compensation expense related to employee stock options and our employee stock purchase plan. There is no assurance that the expense that we are required to recognize measures accurately the value of our share-based payment awards and the recognition of this expense could cause the trading price of our common stock to decline.

We measure and recognize compensation expense for all stock-based compensation based on estimated values. Thus, our operating results contain a non-cash charge for stock-based compensation expense related to employee stock options and our employee stock purchase plan. In general, accounting guidance requires the use of an option-pricing model to determine the value of share-based payment awards. This determination of value is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, our expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting restrictions and are fully transferable. Because our employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion the existing valuation models may not provide an accurate measure of the value of our employee stock options. Although the value of employee stock options is determined using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

As a result of the adoption of the required accounting for stock-based compensation, our earnings are lower than they would have been. There also is variability in our net income due to the timing of the exercise of options that trigger disqualifying dispositions which impact our tax provision. This will continue to be the case for future periods. We cannot predict the effect that this adverse impact on our reported operating results will have on the trading price of our common stock.

We may be unable to or elect not to pay our quarterly dividend payment.

The Company began paying a regular quarterly dividend in July 2010, subject to quarterly board of director approval. The payment of, or continuation of, the quarterly dividend is at the discretion of our board of directors and is dependent upon our financial condition, results of operations, capital requirements, general business conditions, U.S. tax treatment of dividends, potential future contractual restrictions contained in credit agreements and other agreements and other factors deemed relevant by our board of directors. We can give no assurance that dividends will be declared and paid in the future. The failure to pay the quarterly dividend or the discontinuance of the quarterly dividend could adversely affect the trading price of our common stock.

We may be unable to adequately protect our intellectual property rights, including our brand name. If we fail to adequately protect our intellectual property rights, the value of such rights may diminish and our results of operations and financial condition may be adversely affected.

We believe that establishing, maintaining and enhancing the Resources Global Professionals brand name is essential to our business. We have applied for United States and foreign registrations on this service mark. We have previously obtained United States registrations on our Resources Connection service mark and puzzle piece logo, Registration No. 2,516,522 registered December 11, 2001; No. 2,524,226 registered January 1, 2002; and No. 2,613,873, registered September 3, 2002, as well as certain foreign registrations. We had been aware from time to time of other companies using the name "Resources Connection" or some variation thereof and this contributed to our decision to adopt the operating company name of Resources Global Professionals. We obtained United States registration on our Resources Global Professionals service mark, Registration No. 3,298,841 registered September 25, 2007. However, our rights to this service mark are not currently protected in some of our foreign registrations, and there is no guarantee that any of our pending applications for such registration (or any appeals thereof or future applications) will be successful. Although we are not aware of other companies using the name "Resources Global Professionals" at this time, there could be potential trade name or service mark infringement claims brought against us by the users of these similar names and marks and those users may have service mark rights that are senior to ours. If these claims were successful, we could be forced to cease using the service mark "Resources Global Professionals" even if an infringement claim is not brought against us. It is also possible that our competitors or others will adopt service names similar to ours or that our clients will be confused by another company using a name, service mark or trademark similar to ours, thereby impeding our ability to build brand identity. We cannot assure you that our business would not be adversely affected if confusion did occur or if we were required to change our name.

[Table of Contents](#)**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**

In April 2011, our board of directors approved a stock repurchase program, authorizing the purchase, at the discretion of the Company's senior executives, of our common stock for an aggregate dollar limit not to exceed \$150 million. This program commenced in July 2011 when the previous program's authorized limit had been met. The table below provides information regarding our stock repurchases made during the second quarter of fiscal 2013 under our stock repurchase program.

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Program</u>	<u>Approximate Dollar Value of Shares that May Yet be Purchased Under the April 2011 Program</u>
August 26, 2012 — September 22, 2012	—	\$ —	—	\$ 97,843,698
September 23, 2012 — October 20, 2012	224,191	\$ 13.25	224,191	\$ 94,872,836
October 21, 2012 — November 24, 2012	320,410	\$ 12.46	320,410	\$ 90,879,876
Total August 26, 2012 — November 24, 2012	<u>544,601</u>	<u>\$ 12.79</u>	<u>544,601</u>	\$ 90,879,876

**Certification of Chief Executive Officer
Pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934**

I, Donald B. Murray, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Resources Connection, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

I, Nathan W. Franke, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Resources Connection, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

WRITTEN STATEMENT
PURSUANT TO
18 U.S.C. SECTION 1350

The undersigned, Donald B. Murray, the Chief Executive Officer of Resources Connection, Inc., and Nathan W. Franke, Chief Financial Officer of Resources Connection, Inc. (the "Company"), pursuant to 18 U.S.C. §1350, hereby certify that, to the best of their knowledge:

- (i) the Report on Form 10-Q of the Company for the quarter ended November 24, 2012 (the "Report") fully complies with the requirements of Section 13(a) or 15(d), as applicable, of the Securities Exchange Act of 1934, as amended; and
- (ii) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Dated: January 3, 2013

/s/ DONALD B. MURRAY

Donald B. Murray
Executive Chairman and Chief Executive Officer

/s/ NATHAN W. FRANKE

Nathan W. Franke
Chief Financial Officer and Executive Vice President

The foregoing certification accompanies the Report on Form 10-Q pursuant to 18 U.S.C. Section 1350. It is not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and it is not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.
